eSmart Libraries is a behaviour change system for libraries to improve cybersafety and wellbeing.

eSmart Libraries is a partnership between The Alannah and Madeline Foundation and the Telstra Foundation. It is one of the most significant community cybersafety initiatives ever undertaken in Australia.

## eSmart Libraries benefits

### Libraries will receive:

- a free and comprehensive system to help libraries integrate cybersafety in their policies, agreements, staff development, organisational culture, training and day-to-day operations
- an online framework to help libraries identify gaps and provide a benchmark for best-practice
- collation of the most relevant resources and practical tools about cybersafety in one place. Resources are carefully selected and developed by specialists and come in a variety of formats, including videos and interactive games
- assistance for library management and staff to improve their knowledge, guidance and training for library users
- help to increase awareness in the library community of the benefits and risks of going online.

## Want to know more and sign up?

To learn how your library can participate from July 2013, or for more information, visit [www.esmartlibraries.org.au](http://www.esmartlibraries.org.au)
